

PhpED 5.8 - the world famous PHP IDE, now with the support for JavaScript code navigation and PHP Debugger for PHP 5.3. NuSphere's Vice President of Engineering Dmitriy Dmitrienko said: "The release of PhpED 5.8 demonstrates our commitment to provide our users with the best tools not just for PHP development, but for entire Web 2.0 applications suite. We started this trend with the code navigator for HTML and CSS and now delivered what we think is the best navigation tools for JavaScript. And of course the release of PHP Debugger for PHP 5.3 will enable our users to take advantage of the latest in the greatest in PHP technologies". In this issue:
